DETAILED ACTION

The amendment filed September 15, 2003 amending claims 1-13 and 17-37 and adding claims 40-57 has been entered.

The Declaration under 37 C.F.R. § 1.132 by Dr. David Weiner filed September 15, 2003 has been entered.

Claims 1-14 and 17-57 are pending.

Upon further consideration in view of the amendment the following restriction is required.

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, 12-14, 17-24, 35-57 (all in part) and claims 4, 25, drawn to a polynucleotide encoding an aspartate transaminase of SEQ ID NO:25, a probe and a method of making thereof, classified in class 435, subclass 193.
- II. Claims 1-3, 12-14, 17-24, 35-57 (all in part) and claims 5, 26, drawn to a polynucleotide encoding an aspartate transaminase of SEQ ID NO:26, a probe and a method of making thereof, classified in class 435, subclass 193.

Art Unit: 1652

- III. Claims 1-3, 12-14, 17-24, 35-57 (all in part) and claims 6, 27, drawn to a polynucleotide encoding an adenosyl-8-amino-7-oxononanoate aminotransferase of SEQ ID NO:27, a probe and a method of making thereof, classified in class 435, subclass 193.
- IV. Claims 1-3, 12-14, 17-24, 35-57 (all in part) and claims 7, 28, drawn to a polynucleotide encoding an acetylornithine aminotransferase of SEQ ID NO:28, a probe and a method of making thereof, classified in class 435, subclass 193.
- V. Claims 1-3, 12-14, 17-24, 35-57 (all in part) and claims 8, 29, drawn to a polynucleotide encoding an aspartate aminotransferase of SEQ ID NO:29, a probe and a method of making thereof, classified in class 435, subclass 193.
- VI. Claims 1-3, 12-14, 17-24, 35-57 (all in part) and claims 9, 30, drawn to a polynucleotide encoding a glucosamine:fructose-6-phosphate aminotransferase of SEQ ID NO:30, a probe and a method of making thereof, classified in class 435, subclass 193.
- VII. Claims 1-3, 12-14, 17-24, 35-57 (all in part) and claims 10, 31, drawn to a polynucleotide encoding a histidinol-phosphate aminotransferase of SEQ ID NO:31, a probe and a method of making thereof, classified in class 435, subclass 193.

Art Unit: 1652

VIII. Claims 1-3, 12-14, 17-24, 35-57 (all in part) and claims 11, 32, drawn to a polynucleotide encoding a branched chain aminotransferase of SEQ ID NO:32, a probe and a method of making thereof, classified in class 435, subclass 193.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-VIII are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions I-VIII are drawn to polynucleotides encoding aminotransferases/transaminases having different structures and different functions and thus, different utilities. Therefore, where structural identity is required, such as for hybridization or expression, the different sequences have different effects.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Gregory Einhorn on December 22, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1652

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).
